NP PDA Orientation 2009 – Blackberry 8800 Series

Blackberry 8800 – How to install a microSD card – Step-by-Step

The Blackberry 8800 supports mass storage devices, and specifically a compatible microSD (micro SD, not miniSD) or TransFlash compatible card.

Here is the step-by-step:

1. Slide the back cover casing from the Blackberry 8800 series by pushing the silver Blackberry logo on the back and sliding down.

2. Open up the microSD holder by sliding the locking mechanism towards the battery and then flipping the casing upwards. Note that your battery does not have to be removed or your Blackberry be turned off for you to complete this guide.

3. Make sure you have the microSD (micro SD) card ready to install.

4. Insert the microSD card with the metal contacts facing towards you exposed and so the contacts are at the base of the connector.

5. Rotate the microSD connector back to the unit and slide upwards towards the unit to lock the microSD card into your BlackBerry 8800 series.

6. Replace the cover on your BlackBerry 8800.

7. The next time you connect your BlackBerry 8800, you will be prompted whether to enable the advice as a mass storage device. If you choose yes, then your microSD card will be seeing by your operating system as an additional drive. This means that you can transfer files back and forth through Windows 2000, Windows XP, and Windows Vista without having to use the BlackBerry [Desktop Manager](#). The recommended response is yes.
